Profile

Strategic Data Engineering Leader & Cloud/AI Solution Architect with 11+ years of experience driving enterprise data modernization, enabling AI adoption, and establishing robust data governance frameworks to ensure accuracy, quality, and business value. Possess expertise in building scalable and fault tolerant applications on MS Azure and Google cloud platforms. Proven ability to manage development and delivery of end user Products, build and lead teams of talented professionals to develop valuable solutions to meet business objectives.

Skills

Big Data/Cloud & AI –
Microsoft Azure Cloud xervices (Azure Databricks, Azure Data Factory, Azure Active Directory, DBX Unity Catalog, Azure Key Vault, Azure SQl, DBX Agentbricks) | Google cloud platform services (GC Data Proc, GC Pub Sub, GC Composer, GC SQl and Spanner etc), HDFS, Kafka, Hive, Cassandra,
Languages - PySpark, Scala
Version control – GitHub, Gitlab, Bitbucket, Azure Devops Board
CI/CD - GitActions, Jenkins
Visualization tools – Tableau, Power BI
AI tools – M365 Copilot, Replit, ChatGPT, Gemini, AI frameworks, Prompt Engineering etc.

Industry & Domain experience -

BFSI | Healthcare | Telecomm | Computer Hardwares | Hospitality and Travel | Retail
Data Modenization | Data Governance | Gen AI Tooling SME | Data Quality | Cloud Migration and ETL Specialist | Solution designer

Certification -

Google certified Professional Cloud Architect
Azure cloud solution architect

Education

B.Tech - Information & technology | IIMT Engineering college | 2014

Experience – 11+ Years in Data Engineering and AI

Publicis Sapient September 2023 till Present
Role – Manager Data Engineering and Lead Cloud Solution Architect

- Designed and delivered AI-powered Martech applications for a Fortune 5 healthcare client, enabling personalized patient engagement campaigns.
- Built a marketing data platform integrating batch and real-time sources, delivering 400+ targeted campaigns to customer journey platforms.
- Developed AI-driven recommendation engines for healthcare marketing, improving campaign accuracy and patient outreach effectiveness.
- Championed cloud migration initiatives, optimizing resource utilization and reducing infrastructure costs.
- Provided technical leadership in architecture reviews, ensuring scalability, governance, and compliance with healthcare data standards.

Accenture Strategy & Consulting **June 2019 – September 2023**

Role – Manager Data Engineering

- Being part of Strategy and Consulting in Accenture Applied intelligence team, gathered hands-on experience in managing development and delivery of E2E technology products and applications using Big Data Tool stack, Azure Cloud Services and GCP.
- Delivered multiple data engineering & Analytics projects across functions, data modernization, cloud data migration and transformation, building scalable cloud solution designs, pre-sales architecture & RFP activities thus helping and enabling enterprises realize revenue growth.
- Responsible for managing teams from offshore for various clients, stakeholder communications and agile SDLC activities.
- Experienced dealing with high scale & volume of data transformation and processing keeping data quality, data governance, data security and other agile based parameters in view.

Zebra **July 2018 – May 2019**

Role – Manager Data Engineering and Lead Cloud Solution Architect

- Designed and developed ETL workflow for data migration requirement from AWS S3 buckets to On-Prem Cassandra server after transformation.
- Developed multiple Kafka Stream jobs for Near real time data ingestion and processing.
- Developed multiple Spark application based on stakeholders' needs for data transformation and reporting needs.
- Delivered on cloud migration journey of data pipelines and workflows from OnPrem to GCP.

ITC Infotech **January 2018 – June 2018**

Role – Lead Consultant

- For a Global Banking Major - Provided solution to ease work for monitoring and support teams.
- Optimized existing Spark Scala code by applying Industry standard coding practices
- Created data model and generated control flow diagram for the application.

Cerner Healthcare (An Oracle company) **February 2017 – December 2017**

Role – Senior Software Engineer

- Now acquired by Oracle, Cerner Healthcare solutions is a leader in its segment as healthcare service provider.
- Migrated 6+ PB of Data from on-prem systems to Azure and then delivered multiple reporting requirements through Tableau.

Birlasoft India Pvt Ltd **June 2014 – January 2017**

Role – Lead Cloud Solution Architect

- Migrated humongous relational data from SAP table to HDFS
- Created Hive tables for storing imported data using Partitioning and automated multiple jobs.
- Developed HIVE SCRIPTS to fetch data from Central repository using Sqoop and wrote a Shell Script for automating this job.
